DASHCAMS - 360 VIEW - E MIRRORS - REVERSING - WIRELESS

THE BO5 CAMERA

A small compact 1080p camera that can be used as a 360 view kit.

R46 WING MIRROR REPLACEMENT KIT

The AIDA E-Side Mirror System enhances safety by delivering advanced driver assistance and ensuring clear visibility on both sides of the vehicle.

360 KIT

A full 360 view of your vehicle.

THE UNIVERSAL CAMERA

A full 1080p camera that can be used as a front, rear, or side view.

1080P REVERSING CAMERA

A solid 135 degree 1080p reversing camera.

DASHCAMS

ADAS or DMS Dashcams for driver behaviour monitoring or assisted driving

AIDA WIRELESS MAGNETIC CAMERA KIT

Available as a 1 or 2 piece camera kit. As a magnetic or bolt on camera. This kit is perfect for vehicles that tow or plant machinery that needs an extra pair of eyes when being operated.

ALL-IN-ONE FLEET MANAGER APP

GPS
LOCATIONS

The AIDA Fleet system is an all-in-one fleet manager app, providing your business with full data knowledge and management of your fleet in one place.

Integrate with AIDA camera systems for a full safety system for your fleet.

GEOFENCING
CONFIGURATION

Improve your fleet management with our range of vehicle management software. Subscribe to one or all of the systems.

AIDA Tracker	A simple fleet tracking system
AIDA Analytics	Analyse and view data from the CAN Bus
AIDA LIVE View	LIVE View cameras installed on your vehicles
AIDA Tacho	View and analyse data from vehicle tachographs
AIDA Vehicle Management	Upload all of your vehicle data and reminders for improved fleet management
AIDA Fleet	Our All-in-One system that includes all of the feature above in one place

Note: Hardware and installation will be required to use the software and a monthly subscription will apply.

- MOIS 180 Degree dual facing radar
- BSIS 180 Degree dual facing radar
- Compact in cab monitor
- Audio left turn speaker
- Blind Spot Sticker

AIRBAR
by AIDA

>>> **ROADSIDE SAFETY** >>> **CYCLIST SAFETY** >>> **COMPOUND SAFETY**

Inflatable System

AIRBARS use an exclusive air control technology that inflates using compressed air at low pressure and contains a rebound mechanism to recoil.

Creating safer zones around vehicles. AIRBAR is the world's first vehicle retractable safety device that helps save lives.

AIRBAR is a highly visible inflatable vehicle mounted flexible membrane that, when deployed, helps to create a safety zone around the vehicle. It was designed specifically to help protect drivers and vulnerable road user (VRUs).

We offer a wide selection of lighting products, including strobe lights, LED strobes, beacons, lightbars, and STT lights.

Give us a call—we'll provide a solution tailored to your needs!

AIDA HALO/ARC LIGHT

This 16w light safely alerts pedestrians to possible danger zones by creating a visible light barrier, enabling them to keep a safe distance from moving cars and machinery.

AIDA LINE SAFETY LIGHT

Provides a highly visible red safety line of light to alert people to the danger zone of a moving vehicle or area.

DVS KITS AT

An installation of DVS Kits for the VACTEC UK Fleet to enable them to operate and drive their vehicles within the restriction zones in London.

"We recently had a DVS (Direct Vision Standard) kit installed on our VAC EX truck by Shane from AIDA, and we couldn't be more satisfied with the service. Shane was professional, efficient, and clearly knowledgeable about the system. The installation was carried out with great attention to detail, and the final setup was clean and well-integrated into the vehicle."

Communication with AIDA was smooth from start to finish, with clear scheduling and prompt support. It's reassuring to know the truck is now compliant and safer for London operation. Highly recommended service - thanks to Shane and the team at AIDA!"
Connor Yandell - VAC TEC UK

VAC-EX[®].com

INSTALLATIONS

- AIRBARS
- Stop and tail lights
- Lightbars
- DVS Kits
- 360 Cameras
- Recordable MDVRs
- Worklights
- LED Strobe lights
- Custom fit 'v' grill lighting
- Beacon lighting
- Magnetic Wireless Camera kits for trailers
- Red Light safety lighting
- Dashcams

DVS KITS AT

Installing DVS Kits on the DIG SAFE fleet so they can work in the London restriction zones without incurring a fine. Kits installed, certificates issued and permits granted.

"We took a look round the Aida systems stand at SCOTPLANT and the new DVS system was what we required as a company. Aida was more than accommodating to help with our mixed fleet of Left and Right hand drive trucks and ensured all was in order for the new London DVS changes. On receipt of our certification we had submitted our new permit to TFL and came back within hours with no issues - Thanks AIDA"
